

Pressure & stress

GOALS MONTH 2

- You recognize the physical and mental signals of stress in yourself
- You master at least one breathing technique to regulate activation
- You can name the difference between problem-focused and emotion-focused coping

Feeling pressure is normal. Every top athlete feels it. What makes the difference is how you deal with it. This worksheet helps you discover how your body and mind respond to stress.

EXERCISE 1: BOX BREATHING LOG

1 Box Breathing Log

Practice Box Breathing at least 3× this month. Note date, situation and how you felt before and after (scale 1–10).

DATE & SITUATION

BEFORE (1–10)

AFTER (1–10)

What do I notice after Box Breathing in myself?

EXERCISE 2: STRESS DIARY

2 Stress Diary

Write after your next match: what did you feel, what did you think, what did you do?

What did I feel? (physical and emotional)

What did I think?

What did I do? (how did I respond to the pressure?)

EXERCISE 3: WORST CASE, BEST CASE, MOST LIKELY

3 Worst Case Best Case

Think of a situation that makes you nervous. Write the three scenarios and make a plan.

WORST CASE**BEST CASE****MOST LIKELY**

My action plan when pressure builds up:

MENTAL RESILIENCE: PRE-GAME ROUTINE

Write your ideal mental preparation before a match (3 steps: breathing, focus-word, action). Practice this at least 2× this month.

My pre-game routine in 3 steps:

"Pressure is a privilege. It only comes to those who earn it."

Billie Jean King, 39× Grand Slam Champion
